HILL'S IRISES

TERMS AND CONDITIONS

All Iris orders amounting to \$2.00 or more will be shipped prepaid to any point in the United States. Iris orders of less than \$2.00 must include 25 cents for postage. Foreign shipments not prepaid.

We send all Peonies by express, transportation charges collect. This enables us to be liberal with extras and large plants. However, all customers will receive good value.

Terms: Cash with order. Payment should be made by check or postal money order. All offers subject to prior sale; prices may be changed without notice.

GUARANTEE

We Guarantee all stock to be true to name, of first class size and quality, free from diseases and pests, and to reach you in live and healthy condition. We cannot guarantee that plants will live and grow in your garden under conditions over which we have no control.

We take every precaution to prevent mistakes in filling orders, but if any mistakes should occur, we will gladly make adjustment; however, we will in no case be liable for an amount greater than the purchase price of the stock.

IRIS CULTURE

Irises are not particular as to soil, but the bearded varieties in general prefer an alkaline rather than an acid soil. They need plenty of sunshine and good drainage and are able to withstand severe drought if well established. Beardless and crested sorts, including the Siberians and Spurias, do best in an acid soil with plenty of moisture, also some kinds need partial shade. Bearded Irises should be planted with the tops of the rhizomes level with the top of the ground, except in the case of late fall planting when they should be more deeply covered to prevent heaving.

TIME TO PLANT

Bearded Irises may be transplanted any time in the spring, summer or fall, but we strongly recommend fall planting for the South and Middle West where summers are usually hot and dry. Further North the summer months are the best time for transplanting. Unless we are otherwise instructed we will assume that our cus-

tomers want immediate shipment of their orders. Prompt shipment will be made except when digging is delayed by rain or other causes over which we have no control. A few of the very newest varieties of which our stocks are limited will not be delivered before August. Beardless Irises will be shipped in the fall or early spring.

WAR AND OUR PLANT BUSINESS

Robert, the junior and most important member of our firm, has gone to the army and all the young men of the country are in the Army, Navy or necessary war production. Increased cost of labor, advertising, paper, boxes, packing and postage makes it impossible to dig, clean, pack and mail only \$1.00 collections without losing money, hence we will try to solve this problem by giving more quality and less quantity. Now we can discard and plow under more of the older and poorer sorts and give more valuable time to better and newer sorts, and this gives our customers better value.

PRICES—If any of our early season prices are out of line just figure that we will give you good value on every order. Why give valuable space, land and labor to grow old cheap varieties, Put the same money in a smaller number of higher quality and have increased satisfaction.

Hill Iris Introductions will be found listed inside the back cover at greatly reduced prices. Their reception and increasing popularity are a great source of gratification.

We lead in Fall Blooming Irises that continue their well deserved gain in popularity. Favorable seasons have brought an abundance of fall bloom to many delighted gardeners. In the South the Fall Bloomers are practically everblooming.

Scarcity and increased costs of supplies and labor have brought commercial growers many problems, but we expect to be able to continue to supply good quality plants and in many cases at prices substantially lower than last year's. The difficulty of securing experienced workers may cause slight delays in shipment during the peak of the shipping season. Customers are urged to send their orders early and to indicate second choice varieties in case we are sold out of some items. However substitutions will not be made without authorization.

SELECT IRISES

TALL BEARDED AND INTERMEDIATE

Separate lists of Standard Irises, Fall Blooming Irises, Dwarfs, Pogo-Cyclus hybrids, Beardless Irises, Peonies and Hemerocallis will be found on following pages.

In the following descriptions the letter S refers to the standards or upright petals, F refers to the falls which are the lower or hanging petals. A self is an Iris of uniform color, a bicolor has standards of one color and falls of a deeper shade, a plicata is a light or white flower marked or stippled with a darker shade particularly on the margins, a variegata has falls of red, brown or red-purple and yellow standards, an amoena has white standards and colored falls, and a blend is a combination of two or more colors. Intermediates are early flowering sorts resulting from crosses between tall bearded Irises and dwarfs. The first intermediates were intermediate in size, height and season of bloom, but the newer ones are as large and tall as tall bearded varieties.

NOTE: Most all customers instruct us to send their Peony orders and large Iris orders express charges collect. This enables us to include more numerous extras and heavier plants. We guarantee that customers giving such instruction will be more than repaid for the transportation costs.

VICTORY IRIS GARDENS

Save time, labor, simplify your problems, grow fewer plants and better and help us. We will be compelled to serve less customers, lose money, waste our time and labor on all orders under \$2.00 and make very little on \$3.00 orders, so why not concentrate on \$5.00 and up orders. We can really begin to smile and when we are in a good humor we are liberal with good plants.

AMATEUR HYBRIDIZERS

Send us a \$25.00 War Bond, cost to you \$18.75, and get full value at maturity in splendid plants of the finest sort for crossing—NOW. Here is a suggested list:

FALL BLOOMING IRISES

We are proud to take some credit for popularizing Fall Blooming Irises, an important new branch of the Iris family. Several years experience in handling fall bloomers has shown conclusively that they will produce two crops of bloom per year over a wide area of the country. They are at their best in the South where they furnish an almost continuous succession of bloom. In fact a Southern customer reports at least one bloom open every day in the year from one of our \$1 collections. However, with care and attention fall bloom can be had as far North as New England and some of the Northern states. Last fall we had a fine show with many hundreds of blooms, beginning in September and lasting until freezing weather in November. The fall bloomers are of unquestioned hardiness even in the North and are of value for their color to the intermediate season. New varieties are adding to the color range and bringing increased size and height. Good growing conditions and adequate moisture throughout the growing season produce the rapid growth necessary for maturing the second crop of bloom. Frequent transplanting is advisable as crowded plants do not have a chance to rebloom.

AUTUMN ELF (Brown, 1935)—This variety has re-bloomed throughout the summer and fall in the originators garden in Massachusetts. Standards olive cream, domed and ruffled; falls lavender with cream edge, flaring; fragrant\$0.15

AUTUMN FLAME (Sass)—A sensational new fall bloomer of very large size and heavy substance, deep toned red bicolor\$3.00

AUTUMN FROST (Schreiner, 1934)—A seedling of Moonlight with much the same warm white tone. It is the largest and tallest white fall bloomer \$0.25

AUTUMN HAZE (H. Sass, 1934)—This tall fall bloomer has been both early and persistent in its long blooming habit and marks a real advance over fine old Autumn King. In effect it is an attractive soft lavender of fine form and large size\$0.15

AUTUMN KING (H. Sass, 1924)—The real progenitor of the race of rebloomers. Typical lavender blue bicolor of splendid form, a good seed bearer \$0.15

AUTUMN KING, JR.—A redder Autumn King\$0.25

AUTUMN QUEEN (H. Sass, 1926)—The most persistent of all rebloomers, giving some bloom every month from summer to fall. It is a pure white of exceptional form, the finest white dwarf\$0.15

AUTUMN SUNSET (Lapham 1939)—This fine and large blended pink brings a delightful new color tone to the reblooming section—and it has inherited quality and vigor from two recent Dykes Medal Winners — both strong growers and free bloomers. Rosy Wings and Rameses\$3.00

BOUNTIFUL BLUE (Hill-Son 1942)—This is not a flower to take to an Iris show and yet it is so profuse with bloom that it is distinctly showy and makes a great mass of true blue color in early spring, late summer and fall\$1.00

DORCAS HUTCHESON (Sass-McDade, 1933)—An early and persistent pansy violet self. Semi-dwarf, up to 20 inches\$0.15

ELEANOR ROOSEVELT (Sass - MacDade, 1933)—This variety was awarded the Hutcheson Gold Medal for the best fall bloomer of its year. It is a deep fluorite purple self of fine carrying power and has given us a full month of bloom in the spring and in favorable seasons three full months in the fall\$0.15

GLAD SONG (Sass-Hill 1942)—With a flourish of trumpets comes this first of the yellow ground plicatas into the reblooming class from the master breeder of rebloomers H. P. Sass. By chance it rebloomed first here in our garden and is now first offered to our customers exclusively. It is from the Tiffany strain\$3.00

FAR SOUTH—A neat bright pure yellow of good form that gave us fine bloom last fall\$1.00

GOLDEN CATARACT—Bright golden yellow and announced as a consistent rebloomer on the West Coast, and will no doubt prove a repeater in the South but has not given fall bloom here yet\$0.50

JEAN SIRET—One of the French remontants or everbloomers. It is only fair in quality as a yellow dwarf, but has undoubted value in its persistent reblooming habit and strong growth \$0.15

KANSAS INGLESIDE (Hill)—Large warm toned red self introduced last year and now proven to be a fall bloomer, although rather late ...\$1.00

LIEUT. DE CHAVAGNAC—Deep red violet dwarf, another French ever-bloomer\$0.25

MARTIE EVEREST (Kirk, 1635)—Fine tall blue, a reliable repeater\$0.35

OCTOBER BLAZE (McDade, 1935)—Large red-purple, somewhat on the order of Indian Chief, late\$0.35

OCTOBER OPERA (Sass)—The oldest red rebloomer we have. Sold short last year but now have plants\$0.25

OLIVE WHITE—Creamy olive white \$0.15

POLAR KING (Donahue)—The famous \$300.00 Iris that was given an award by the American Hort. Assn., and bloomed several falls in succession in Massachusetts. Gave us fall blooms last year\$2.00

SANGREAL (J. Sass 35)—Fine new chrome and citron yellow that has proven itself the most persistent and profuse reblooming yellow giving bloom almost constantly through spring, summer and fall\$0.25

SOUTHLAND (H. Sass, 1934)—Fine yellow fall bloomer and unusually valuable because it is also one of the very best bright golden yellow spring bloomers, vigorous and strong. An Iris possessing all these splendid qualities is assured of great popularity ...\$0.15

WHITE AUTUMN KING (H. Sass, 1935)—Strong growing erect flowers of pure white color and beautiful finish, blooms freely in the fall\$0.15

COLLECTION OF FALL BLOOMERS

Our Fall Blooming Iris Collections have been so well received that we are making them better. More and more gardeners are experiencing the thrill that comes with producing fine Iris blooms in the fall. These are tested varieties that have proved their worth in hundreds of localities.

BIG BARGAIN COLLECTION — Autumn Elf, Autumn Queen, Autumn Haze, Bountiful Blue, Eleanor Roosevelt, Martie Everest, October Blaze, Sangreal, 8 for\$2.00

OUTSTANDING COLLECTION — All the above eight and Golden Cataract and Kansas Ingleside, 10 for\$3.00

VICTORY COLLECTION—All ten of above outstanding collection and Glad Song\$5.00

DWARF BEARDED IRISES

The dwarf group is becoming more useful and popular as new and improved varieties are added. Somewhat taller sorts with several blooms to the stem and table Irises noted for their small graceful flowers are being developed. The season of bloom has also been made longer and extended into the tall bearded season. The dwarfs are ideal for borders and rock gardens. Give them the same treatment as tall bearded sorts.

Our new *Arenaria* seedlings are so fine that we would be justified in going into much detail and enthusiastic description, but will hold ourselves down to plain facts.

AUTUMN QUEEN (Sass)—Fall Blooming dwarf white of most perfect form, gives bloom all summer\$0.15

BRONYA (Hill-son) Tony x *Arenaria*.—A wee Tony in color, stem slender \$2.00

HILL'S PEONIES

PEONIES

Peonies offered in this list are varieties of proven merit and quality. Prices are for standard three- to five-eye divisions guaranteed true to name. Delivery of Peonies will begin in September and continue until freezing weather. All orders will be acknowledged and filled in the order in which they are received.

Peonies do best in rich soil. Use fertilizer or well rotted manure if your soil needs it, but do not allow fertilizer to come in direct contact with the roots. Peonies are shipped in damp moss, but they should be soaked in water for a few hours before planting. In planting, be careful not to cover the roots too deep; the eyes or buds should not be covered more than two inches. All plants will be carefully labeled and packed. Sent by express, you to pay charges on heavy blooming divisions.

HILL IRIS INTRODUCTIONS

It was with some hesitation that we offered a modest list of Hill seedlings last year. The response has been such that we feel that we were entirely justified in introducing them. Reports indicate that Flora Campbell bloomed well in several widely separated parts of the country and was well rated. Other varieties also performed well in different gardens and Melanie gave the tallest and finest bloom in one of Oklahoma's show gardens.

These seedlings are the result of several years work, and they have been selected with the idea of offering only sorts whose performance has been well tested. We are glad to be able to vouch for their vigor and hardiness. A period of testing also allows time for a seedling to increase, so that it may be introduced at a lower price than would be possible where it is offered the first year after blooming.

Our own introductions have been full and well tested before naming and have been well received, and we are proud that both Flora Campbell and Melanie were included in Robert Schreiner's 1942 list of 100 best and both have been awarded honorable mention by the American Iris Society. From the standpoint of vigor and freedom of bloom our Kansas Ingleside has proven our very best red and makes a gay and bright splash in the garden and Kansas Bouquet has proven our very best plicata among a host of good ones. And Gladson is, we feel confident, destined to prove the best yellow ground plicata to rebloom, and both it and Kansas Ingleside will rebloom in all Southern States. In dwarf Iris the Arenaria seedlings are so promising that Paul Cook has pronounced them a distinct new race of midgets and we expect these to finally appear in all colors, but have not yet found the ideal white.

FLORA CAMPBELL—The neat, well rounded and modestly extended falls are really glowing in intense warm tones of red-brown and peach. The standards are a little lighter in tone with a more hazy coloring. The flower possesses unmistakable style and quality. Honorable Mention 1940\$2.00

JAYHAWK—A good bright red-purple that is a favorite with garden visitors. Flowers are large and well proportioned\$0.25

KANSAS BOUQUET—A very free flowering plicata of good size, white heavily marked with blue, often has 5 to 7 blooms open on one stalk\$1.00

KANSAS INGLESIDE—A warm toned red self introduced last year on its merits as a spring bloomer, it has now proven to be a good fall bloomer. The fall bloom comes rather late, so it is best adapted to the South for fall blooms.\$1.00

KANSAS SUNRISE—A bright toned variegata blend displaying the good qualities of its parents, King Tut and King Midas, stylish in form and of good substance\$1.00

GOLDEN COCKEREL (Whiting-Hill, 1940)—A bright yellow self selected from among the many fine seedlings in the Whiting garden, fine form\$1.00

LADY DAINY—A silvery toned white that seems to fill a definite need in a hardy, good quality white that will bloom freely every season\$0.50

LOVELY LADY—Well branched with large blooms of splendid proportions, opens a very pale sky blue and turns cool white\$0.50

MELANIE (No. 1 pink seedling)—A tall rather deep pink that grows up to 45 inches and often has five blooms open at one time. It has less of the blue and orchid tones found in most pinks. The color tone is on the order of that found in the falls of Rameses\$3.00
